

Slide In Countdown PRO v.3.4

USER MANUAL

"Thank You For Purchasing "Slide In Countdown PRO v.3.4"

Installation

No installation required!

Just double click on the "SlideInCountdownPRO.exe" file you found in this folder to open software.

How To Use

This software is designed to be very easy to use.

All you really have to do is fill in information the way you would do when you are filling out any other form.

Step #1:

Open up the software.

Step #2:

Simply follow the instructions in the software filling in the required information as you go.

Step #3

Once, you are done, you can save the HTML code as a text file on your computer, or copy it to your clipboard to edit it.

Step #4

Upload your edited HTML page to your server and link to it. Your sales page with the Slide In Countdown should now be ACTIVE.

e.g. <http://www.yourdomain.com/salespage.html>

*** If you DO NOT have a server, you can copy the HTML code and paste into any free service e.g. blogger that allows HTML code.*

Slide In Countdown Order Button Image HTML

When you use the image order button in the slide in, use this code.

```

```

Upload your button, to your server and link to it, replacing the URL above.

You can also click on the link in the software to get access to more buttons. However it is recommended that you still go ahead download and upload the buttons to your server, that will ensure they always show up when needed.

**** Recommended maximum height for the order buttons is 60 pixels.**

Additional User Tips

User Tip #1: You can adjust the height and width of your slide in **countdown**, it is just a matter of opening up your HTML code and editing the two values, right in the top of the first section of the stylesheet. **e.g.** *if you want to use larger order buttons.*

User Tip #2: When you are using an order button image, leave the call to action text blank. Leave out the order button URL when you are not using an image.

User Tip #3: The time delay for the slide in increases in multiples of 2. Every 2 is equal to an extra 5 minutes, therefore for a 20 second delay enter 8.

User Tip #4: The software will only countdown to the last day of the month you are currently in. If your expiration date extends into the next month, try start your deal in that month. Otherwise the countdown timer will adjust automatically when the new month begins. Run limited time offers for current month only.

User Tip #5: The ideal order button image size is **250 X 35 px**. The maximum size without having to manually edit the code would be **300 X 60 px**.

Have fun with the software! :)
